

POLARQUILT PALLET COVER

The PolarQuilt range of pallet shippers has been introduced to complement our reusable pallet shipper range for cold chain logistics. The range has been developed to reflect customer demand for a single use modular system that provides excellent performance. All standard pallet sizes available.

The system incorporates a number of unique features combining to provide the safest and most efficient way to deliver food.

Double-seams, velcro-closure, meshed vents, thermal separators and PolarChill™ coolant packs combine to ensure safe delivery.

POLAR THERMAL PACKAGING LIMITED

Polar Thermal Packaging Limited is an ISO 9001:2015 Certified Manufacturing Company
